SUMMARY

I'm a Senior Frontend Developer with 6 years of experience building scalable web applications using React.js and microfrontends. I specialize in creating dynamic, user-focused interfaces with optimized performance and modular code design.

SKILLS

- **Web Technologies:** React.js, Next.js, JavaScript (ES6+), TypeScript, TailwindCSS, Microfrontend, HTML5, CSS3.
 - **Others:** Vite, Svelte, RESTful APIs, Go lang, C++, Python, GIT.
 - **Interests:** Web3, Blockchain, Machine Learning.
-

WORK EXPERIENCE

Product Engineer - Lead I, UST Global - Pune

Jul 2022 - Oct 2025

Revin Core - Forecasting

- Microfrontend setup for a new module in a web project using Webpack, making it easier to scale and update independently. Connected it smoothly with the main system, and created reusable components for simpler maintenance.
- Designed and implemented a reusable, complex grid structure using React.js to seamlessly visualize resource allocation across multiple projects.
- Developed helper functions to streamline the population of accurate values in a complex API request payload for a large-scale web application. Simplified data formatting and validation.
- Resolved production-level bugs in a web application, ensuring smooth functionality and a better user experience.

Deluxe

- Led the development of a new module for a web application using React.js, guiding the team to build a user-friendly feature from scratch. Coordinated tasks, ensured smooth integration with existing systems, and delivered the module on time.
- Designed a JavaScript Web Worker to handle resource-intensive calculation tasks on a separate thread, improving application performance by offloading complex computations on the main thread.
- Managed on-call responsibilities, swiftly resolving critical bug fixes and application build issues in a React.js-based web application.

Software Engineer, Innovation Incubator Advisory - Remote

Jan 2022 - Jul 2022

- Worked as a consultant for UST Global on the Revin Core project, contributing to frontend development using React.js. Collaborated with cross-functional teams to build user-friendly interfaces, integrate API payloads, and ensure seamless data visualization, enhancing overall system efficiency and user adoption.

Frontend Web developer, SourceCode Labs - Redacted, Remote

Feb 2020 - Jan 2021

Software Developer, Wipro Limited - Redacted, Hyderabad

Jul 2018 - Dec 2020

EDUCATION

Bachelor of Science (Computer Science)

Mar 2018

Pune university
